cs50/problems/2025/x/sentimental/cash

:) cash.py exists

**Log**

```
checking that cash.py exists...
```

:) input of 0.41 yields output of 4

**Log**

```
running python3 cash.py...
sending input 0.41...
checking for output "4\n"...
```

:) input of 0.01 yields output of 1

**Log**

```
running python3 cash.py...
sending input 0.01...
checking for output "1\n"...
```

:) input of 0.15 yields output of 2

**Log**

```
running python3 cash.py...
sending input 0.15...
checking for output "2\n"...
```

:) input of 1.6 yields output of 7

**Log**

```
running python3 cash.py...
sending input 1.6...
checking for output "7\n"...
```

:) input of 23 yields output of 92

Log

```
running python3 cash.py...
sending input 23...
checking for output "92\n"...
```

:) input of 4.2 yields output of 18

Log

```
running python3 cash.py...
sending input 4.2...
```

:) rejects a negative input like -1

Log

```
running python3 cash.py...
sending input -1...
checking that input was rejected...
```

:) rejects a non-numeric input of "foo"

Log

```
running python3 cash.py...
sending input foo...
checking that input was rejected...
```

:) rejects a non-numeric input of ""

Log

```
running python3 cash.py...
sending input ...
checking that input was rejected...
```
